

H SERIE

H500, HYDROSTATIC POWER IN A COMPACT MACHINE

An emblematic model of the brand, the H500 marks its big comeback in the 2020 version. Available in 2 models, the MCH H500 and the H500C are machines designed for professionals. Both robust and functional, they are powerful and reliable in all conditions.

Compact in size, they are easy to operate in the most confined spaces. Equipped with a retractable footboard, let yourself be seduced by its pleasant and ultra-simple operation: simply operate its control levers and the machine will respond to your fingertips. Steering, tipping, speed; all the controls are operated via the dashboard. An hour meter is also available.

Designed for the most demanding professionals, they are equipped with a deep tipper, ideal for transporting materials (rubble, sand, stones, bricks, concrete, wood...). Its hydrostatic tipping function makes your work easier, allowing you to unload up to 500 kg at the simple action of the control lever.

ALL GROUNDS, they also know how to adapt to your workplace thanks to its 180x60x38 cm tracks. Take advantage of the H500C model and its loading system; an essential feature to boost your output and fill your bucket in just a few moves.
